Partnership Program

How GRIDLINE Partnership Changes Value

Standalone data centres are typically valued on asset-level cash flow and concentration risk. Platform integration shifts the valuation lens toward:

- Scale
- Predictability
- Capital efficiency

This structural shift underpins GridLine's preferred transaction approach.

STANDALONE ASSET

- Asset Cashflow
- Concentration Risk
- Single Balance Sheet

GRIDLINE PLATFORM

- De-risked earnings
- Predictable revenue
- Capital efficiency
- Operational scale
- Enhanced positioning

*Benefits are illustrative of typical market dynamics. Not projections or guarantees.

Understanding Your Fit

We evaluate facilities with a clear framework that drives alignment to our core investment thesis and strategic priorities. If you're reading this, you should already have an email explaining how well your facility fits our selection criteria. Here's an outline of what each one means for reference.

Exceptional Match

Your facility aligns with every dimension of the GridLine acquisition profile. Expect to hear from us within 24 hours.

Strong Fit

Your facility is a strong candidate for the GridLine platform. We'll be in touch within 24 hours to arrange a conversation.

Qualified

Your facility meets the core criteria. There are a few areas we'd like to explore together — we'll follow up shortly.

Emerging

Your facility shows real promise. Timing or structure may need to align further. We'll follow up to discuss.

Not Right Now

Your facility isn't the right fit at this stage, but circumstances change. We'll keep your details on file and be in touch if that shifts.

Multiple pathways

*8-10x EBITDA multiples reflect historical ranges observed in public market data center platforms. This is illustrative of market dynamics, not a projection of specific outcomes. See CaseStudy (page 7) for supporting market evidence. Actual valuations depend on market conditions, execution, scale, and other factors. GridLine does not guarantee any valuation outcome.

Partnership Options

ROYALTY WITH PARTIAL EQUITY

- Full acquisition with defined revenue participation tied to utilized capacity
- Ongoing cash payments based on deployed megawatts, not operating profits
- Predictable, contract-based cash flow with long-term visibility
- Seller receives minority equity interest in GridLine for platform-level upside
- Long-term participation in facility performance without equity dilution at the asset level

OWNER FINANCE WITH PARTIAL EQUITY

- Agreed enterprise valuation with deferred consideration
- Interest accrues; cash payments from future cashflow or liquidity events
- Seller receives minority equity interest in GridLine
- Lower execution risk, continued platform upside participation

PARTIAL CASH WITH PARTIAL EQUITY

- Blended Structure with partial liquidity at close
- Minority equity
- Increased execution complexity
- Longer close timelines due to capital sourcing

Conceptual frameworks for discussion. Subject to negotiation and due diligence.

Example 10x Scenario

STAGE	VALUATION	KEY TERMS
\$2M @ \$2	1 million shares @ \$2.00 each	Split cash on owner finance & stock
\$8M @ \$8	Minimum \$8 per share	GridLine secures public listing on NASDAQ
\$20M+ @ \$20+	Compounding growth	GridLine acquires more data centres

This is **a hypothetical example** to illustrate the potential upside of early equity.

If you secured \$2M worth of GridLine stock at a hypothetical price of \$2 per share, and the company grew through acquiring more data centres and pursued a NASDAQ listing, those same shares could be worth \$8, then \$20+ per share — turning a \$2M position into \$8M, then \$20M+.

That's the shape of a 10x outcome. This is not a forecast or offer — it's a worked example of how compounding growth rewards early participants.

*8-10× EBITDA multiples reflect historical ranges observed in public market data center platforms. This is illustrative of market dynamics, not a projection of specific outcomes. See CaseStudy (page 7) for supporting market evidence. Actual valuations depend on market conditions, execution, scale, and other factors. GridLine does not guarantee any valuation outcome.
